To the Purchaser

This is the safety alert symbol, it is used to alert the operator to an instruction concerning the personal safety and risk factor of this equipment. Always observe and heed these very important instructions to promote a safe operation with good preventive maintenance habits.

This new BALZER product is designed and manufactured to give years of very dependable service when used for the purpose for which it is intended, and when properly maintained.

NEVER OPERATE THIS EQUIPMENT UNTIL USER FULLY UNDERSTANDS THE COMPLETE CONTENTS OF THIS MANUAL. FOR OWNERS WHO DO NOT OPERATE THIS EQUIPMENT, IT IS THE OWNER'S RESPONSIBILITY THAT THE USER IS PROPERLY INSTRUCTED AND IS FULLY AWARE OF THIS MANUAL'S CONTENTS.

This is important in the safe handling of this equipment and promoting and efficient operation. If there are any questions about areas in this manual, it is important to contact your dealer for clarification.

This machine is warranted as stated in this manual. A registration card is to be filled in by your dealer with your name and address, and promptly returned to the factory. This card provides a ready reference to help you in securing warranty and in answering questions that you may have at some later date.

Operating instructions and parts book are shipped with this machine. If parts of this book are missing or become unreadable, contact your dealer for a new set.

The serial number and identification tag is located on the front of the right tank saddle. Please refer to these numbers when parts or warranty communication is necessary.

PLEASE FILL IN THE FOLLOWING INFORMATION FOR YOUR RECORDS

DATE OF PURCHASE _____

OWNER'S NAME _____

DEALER'S NAME _____

SERIAL NO./IDENTIFICATION NO. _____

WARRANTY

WARRANTY BY MANUFACTURER

Dealer or Distributor understands and agrees that Manufacturer extends only the following Warranty to customers. In the event dealer or Distributor extends any additional warranty (such as by enlarging the scope or period of warranty or undertaking a warranty of merchantability or fitness for any particular purpose) or any other obligation whatsoever, Dealer or Distributor shall: (1) be solely responsible therefor; (2) have no recourse against Manufacturer thereof; and (3) defend, indemnify and hold Manufacturer harmless against any claim or cause of action whatsoever arising out of, or occasioned by, Dealer or Distributor's extension of said additional warranty or obligation.

CERTIFICATE OF GENERAL EQUIPMENT WARRANTY

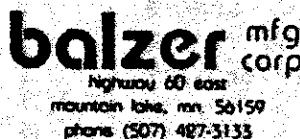

Balzer Mfg. Corp. warrants new Products sold by it to be free from defects in material or workmanship for a period of one (1) year after date of delivery to the first user and subject to the following conditions. Balzer Mfg. Corp.'s obligation and liability under this Warranty is expressly limited to repairing or replacing at Balzer Mfg. Corp.'s option, any parts which appear to Balzer Mfg. Corp. upon inspection to have been defective in material or workmanship. Such parts shall be provided at no cost to user, at the business establishment of the authorized Balzer Mfg. Corp. dealer or distributor of the Product during regular working hours. This Warranty shall not apply to component parts or accessories of Products not manufactured by Balzer Mfg. Corp. and which carry the warranty of the manufacturer thereof, or to normal maintenance (such as tune-up) or normal maintenance parts (such as oil filters). Replacement or repair parts installed in the Product covered by this Warranty are warranted only for the remainder of this Warranty as if such parts were original components of said Product. BALZER MFG. CORP. MAKES NO OTHER WARRANTY, EXPRESS OR IMPLIED, AND MAKES NO WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE.

Balzer Mfg. Corp.'s obligation under this Warranty shall not include any transportation charges, cost of installation, duty taxes or any other charges whatsoever, or any liability for direct, indirect, incidental or consequential damage or delay. If requested by Balzer Mfg. Corp. Products or parts for which a warranty claim is made are to be returned transportation prepaid to Balzer Mfg. Corp. Any improper use, including operation after discovery of defective or worn parts, operation beyond rated capacity, substitution of parts not approved by Balzer Mfg. Corp. or any alteration or repair by others in such manner as in Balzer Mfg. Corp.'s judgment affects the Product materially and adversely, shall void this Warranty.

"NO EMPLOYEE OR REPRESENTATIVE IS AUTHORIZED TO CHANGE THIS WARRANTY IN ANY WAY OR GRANT ANY OTHER WARRANTY UNLESS SUCH CHANGE IS MADE IN WRITING AND SIGNED BY AN OFFICER OF BALZER MFG. CORP. AT ITS HOME OFFICE."

LIABILITY FOR DELAYS

No liability shall attach to Manufacturer or direct, indirect, incidental, or consequential damages or expenses due to loss, damage, detention or delay in delivery of Products resulting from acts or delays beyond its control.

WARRANTY CLAIMS AND RETURN OF GOODS

1. The dealer shall submit each warranty claim to the company within 30 days after the defective part has been replaced.
2. The dealer shall furnish the Company definite proof of delivery date of the machine to the purchaser prior to the Company's honoring any warranty claim.
3. All parts alleged to be defective under the Company's warranty policy shall be made available for examination by the Company, either at the dealer's place of business or factory of the Company, at the Company's option. If examination is to be made at factory, the part shall be returned to the Company with transportation charge prepaid, only after receipt of the dealer of written shipping instructions from the Company.
4. Goods authorized for return to the factory are to be returned by dealer within 30 days from authorization date. Failure to return within the 30-day period will invalidate the warranty claim.

In order to be protected under the terms of the BALZER MANUFACTURING CORPORATION warranty, and to avoid delay in processing warranty claims, the original owner's name and address and the identification numbers of the machine should be registered at the BALZER MANUFACTURING CORPORATION factory within thirty (30) days from the date of purchase. A registration card is furnished with each machine.

Safety

SAFETY SIGNS

Why:

Safety signs or decals are important information and instructions designed to promote personal safety. They are designed to alert you to dangers and hazards that can be present during operation of this equipment. However, safety sign instruction does no good if it is not read, understood and followed.

When:

Safety signs or decals must be kept clean and readable. If they become unreadable for any reason they must be replaced with an identical replacement decal. Safety decals must also be replaced if parts are repaired or replaced with new parts that do not already include the necessary safety decals.

How:

To apply safety signs or decals, surface preparation is very important for safety decals to properly adhere. Grease, oil, and dirt must be removed and the surface must be smooth and dry.

Most decals have a split backing which meant to be removed from the split outward. Apply decals in the following manner:

1. Position the decal in the proper location and hold firmly over the large portion of backing.
2. With one hand holding decal in position, the free hand can carefully roll the loose end over and peel backing outward. When the backing is removed as described and shown in fig.(1), with even and gradual pull, the decal will roll onto the surface smooth and wrinkle free.
3. With the smallest portion of decal attached, the same procedure can be applied to the other half.
4. After the decal is attached in place, use a cloth or soft paper towel to burnish decal onto surface. Work gently from the middle outwards to avoid creating any wrinkles.

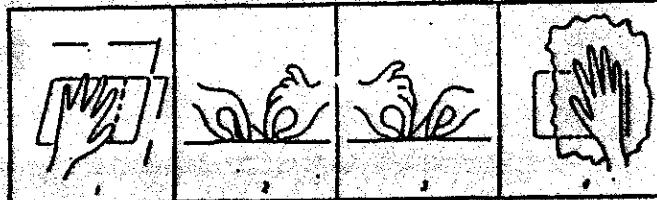

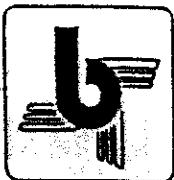

Fig. (1)

Where:

Order replacement decals by part number through your nearest dealer. Part numbers are printed on most decals, later in this section and in the parts section of this manual.

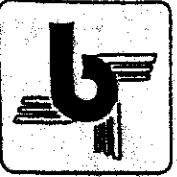

Safety

OBSERVE AND FOLLOW ALL SAFETY PROCEDURES TO PREVENT INJURY OR DAMAGE TO THE MACHINE

1. When agitating a pit always be sure there is adequate ventilation in the confinement area.
2. Never enter a pit unless it is absolutely necessary. If a unit must be entered, take proper safety precautions. These include someone at the site, outside the unit and with proper life support system. Contact your BALZER dealer for more information before you enter a tank.
3. Avoid excessive road speed.
4. Never operate this unit until user is familiar with all controls, and has read and understands operators manual.
5. Read and follow the instructions on all decals.
6. Never lubricate, adjust or repair unit while it is in operation. Power unit engine must be shut off and all movement stopped.
7. Never operate this unit with any guards or shields not in place. Replace any missing or damaged ones.
8. Keep hands and feet away from all moving parts.
9. Never wear loose clothing while working around moving parts.
10. Never leave unit running unattended.
11. Before loading make sure that the unit does not have any foreign objects or material in it that can cause equipment damage or personal injury.
12. Never allow anyone to ride on the unit at anytime.
13. Be sure the rear of the unit has a clean SMV emblem properly displayed if towing less than 25 MPH on any public roadway. At night proper warning and running lights are necessary as required by state law.
14. Always use a safety chain between the towing vehicle and pump on public roadways.
15. Hydraulic pressure can be very dangerous and can cause serious personal injury and death. Be sure to relieve all pressure before disconnecting hydraulic lines.
16. Hydraulic fluid escaping from a very small hole can be almost invisible. Use a piece of cardboard or wood, not your hands, to search for leaks.
17. If injured by escaping hydraulic fluid, seek medical attention immediately. Serious infection or reaction may develop.
18. Never assume that everybody is as safety conscious as you are.
19. Always use a hitch pin that has a safety clip pin.

Operation

OPERATING & MAINTENANCE

Site-Preparation:

Location of the pump is generally determined by the location of the intake and discharge of the material to be pumped. Improper site conditions can adversely affect the operation and maintenance of your pump.

The area around the pump should be kept clear and as level as possible to make the pumping of the material as convenient as possible.

Pre-Operation Check List:

Before placing your pump into the pumping area, you should perform a check of the following items:

1. Inspect for missing or loose bolts.
2. Check all lubrication areas.
3. Check the universal joints in the PTO.
4. Check the condition of all hydraulic hoses and fittings, replace those that are damaged.
5. Check the agitation nozzles movement.
6. Check the condition of the impeller and housing for objects that might obstruct rotation.

Pump Set-Up:

Position the pump in the working area as required, then convert from a towable unit to a working unit.

Connect the PTO shaft and all hydraulic lines to the tractor. Check all lines and connectors, tighten all loose fittings. With the tractors throttle at idle,

check the pump rotation by engaging the control lever. Remember which direction the control lever was moved to produce proper impeller rotation. If it is necessary to purge the hydraulic lines of air, cycling of the cylinders several times will clear the lines.

Next, position the pump into the area of the pit that has the most liquid. Direct the gun nozzle towards the pump to set up a flowing motion of the slurry.

Operating Procedures:

Operation of the pump begins by slowly increasing the PTO rpm's up to the designated rate.

Agitate until the area around the pump becomes liquid, then readjust the gun nozzle to spray the liquid over the top crust to saturate until it breaks into chunks and either sinks to the bottom or floats towards the pump and becomes liquid thru the agitation process. Agitation is complete when there are no solids floating and density of slurry is consistent.

Reduce the PTO speed to idle, position the tanker for filling, and connect to the pump. Slowly increase the PTO speed to 60% of rating for filling the tanker. Continue to agitate while filling to keep the density of the slurry in a liquid state. When tanker is full reduce PTO speed and close filler valve. Disconnect pump from tanker.

When operation of the pump is complete, remove from the pit area and wash complete to insure that all product is removed from the unit, especially around

Parts

It is the policy of the Balzer Mfg. Corp. to constantly improve its products whenever it is practical to do so.

The Balzer Mfg. Corp. must therefore reserve the right to redesign or change its equipment or component parts thereof without incurring obligation to install or furnish such changes on equipment previously delivered.

INSTRUCTIONS FOR ORDERING PARTS

1. Order all parts by their part number and name.
2. Parts should never be ordered from item numbers only.
3. Always mention the model and serial numbers found on name plate of unit on which part is to be used. Much delay and confusion can be avoided when correct model and serial numbers are specified on parts order and correspondence.
4. Owners, order all parts thru your local dealer.
5. Dealers must indicate how to ship: whether by truck, rail freight, express or parcel post.
6. Collect phone calls will not be accepted.
7. Address all orders for parts as follows:

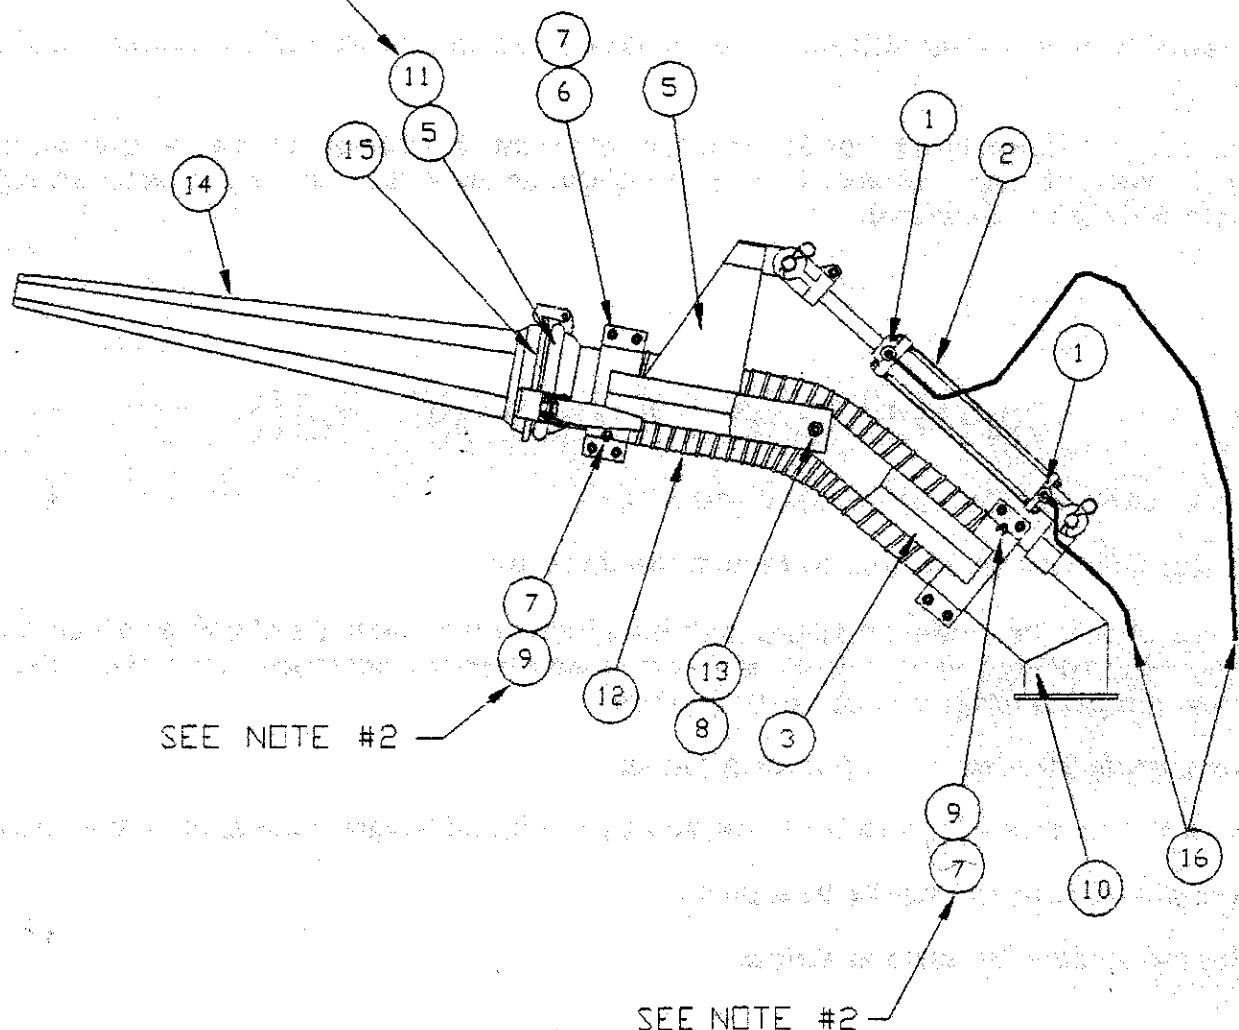

balzer mfg
corp

highway 60 east
mountain lake, mn. 56159
phone (507) 427-3133

INSTRUCTIONS FOR RETURNING PARTS FOR ADJUSTMENT

1. To assure prompt handling of claims, your dealer or distributor should follow standard claim procedure and forward claim within thirty (30) days of any part failure or malfunction believed to be a warranty claim to the Balzer Mfg. Corp. service department for processing.
2. No returned parts will be accepted unless they are transportation prepaid and accompanied by the packing list copy.
3. Parts returned should have a tag attached with senders name and address clearly printed.

Operation

OPERATING & MAINTENANCE CON'T.

the hydraulics portion of the pump. A light coating of oil is recommended to protect against corrosion.

Transporting:

When moving the lagoon pump, the hydraulic lines and PTO shaft that are connected to the tractor should be disconnected and placed in the transport position to avoid damage that could occur during transportation of the pump.

Lubrication:

The operation and lifetime of the components of this pump are dependant on regular and proper lubrication. The frequency of lubrication will depend on conditions of use. Severe or unusual conditions may determine actual service needs.

Replace any broken or missing grease fittings and always clean the fittings before greasing.

All areas indicated on the drawing PL300117 are factory lubricated. Additional lubrication is as follows:

PTO and wheel bearing every 50 hours of running time.

All other areas to be lubricated every 100 hours of running time.

Additional lubrication (provided by the customer) is recommended to be placed in the main tube section of the unit as an aid to help against condensation. Use a SAE 30 wt. (approximately 5 gallons) or heavier motor oil. To add the oil, re-

move the cover plate, as indicated on drawing PL300117, and pour slowly into the tube. Oil will gradually drain towards the PTO end of the unit. Rotation of the drive shaft will cause the oil to lubricate the inside of the main tube.

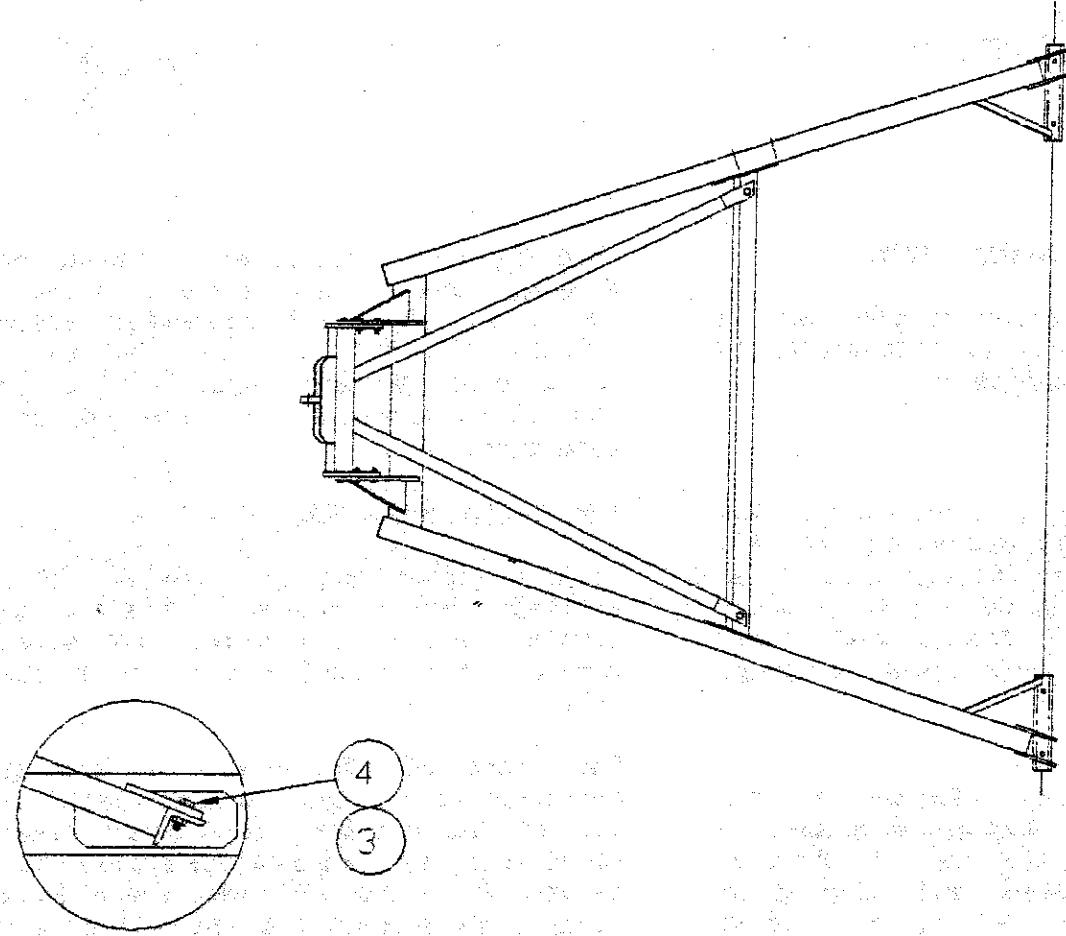

REMOTE CONTROL SYSTEM OPTION:

If your lagoon pump is equipped with a wireless remote control, this system simply replaces the usual hard wired control that normally comes with the valve.

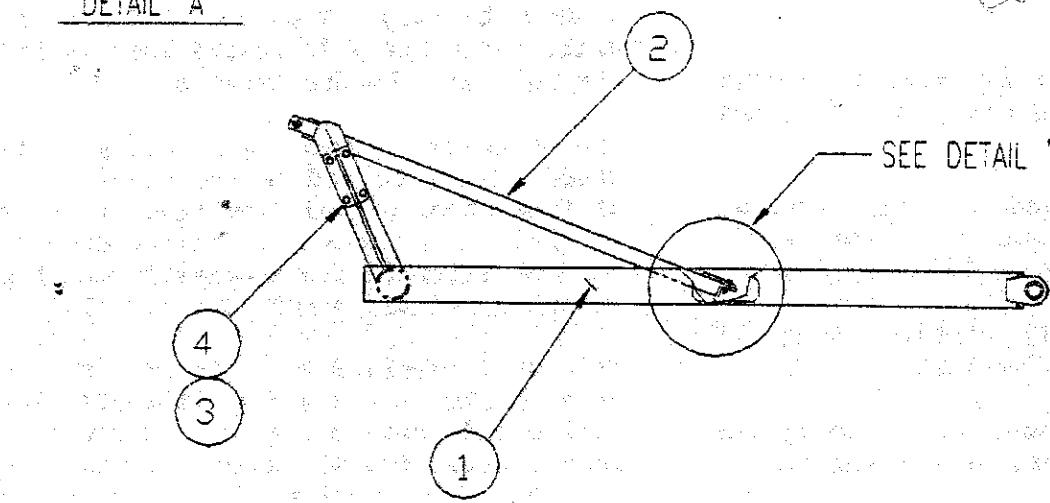

The range of the system is greatly dependant on the location and positioning of the receiver box. Under ideal conditions, the range of the system will be 100 ft. - 150 ft. when there is a clear path between the transmitter and receiver. The transmitter operates on a 9 volt battery. When the battery is weak, the range will become shorter and the unit will become erratic.

The wireless system uses a digitally coded signal to reduce the possibility of some other signal from causing false operation. If there is a radio transmitter operating in close proximity to the receiver, it may block your signal.

This unit operates on a 12 volt system only (refer to drawing PL300129 for wiring information). Most systems will have a power ON/OFF switch in the control box for turning off the wireless receiver. This switch should be turned off when the system is not in use to keep from draining the battery.

CROSS & BEARING

TELESCOPING MEMBERS

CROSS & BEARING

LUBRICATE ALL FITTINGS WITH A GOOD QUALITY LITHIUM SOAP BASE E.P. GREASE MEETING THE N.L.G.I. #2 SPECIFICATIONS AND CONTAINING NO MORE THAN 1% MOYBDENUM DISULFIDE. (EX. SHELL SUPER DUTY OR EQUIVALENT) AN E.P. GREASE MEETING THE N.L.G.I. #2 SPECIFICATIONS AND CONTAINING 3% MOYBDENUM DISULFIDE MAY BE SUBSTITUTED IN THE TELESCOPING MEMBERS ONLY. (EX. MOBIL OIL COMPANY, "MOBIL GREASE CMP"; SHELL OIL COMPANY, "RETINAX AM". TEXACO, "MOLYTEX EP #0 AND #2".)

THE FIRST LUBE INTERVAL SHOULD BE 16-24 HOURS OF OPERATION AFTER INITIAL START-UP THEN FOLLOW THE SCHEDULE BELOW.

LUBE RECOMMENDATIONS

INTERVAL	LOCATION	AMOUNT
8 HRS.**	CROSS & BEARINGS	1 PUMP
8 HRS.	TELESCOPING MEMBERS	4-8 PUMPS

** CONSTANT ANGLE APPLICATIONS MUST HAVE A LUBE INTERVAL OF 4 HOURS.

CAUTION!! REPLACEMENT PARTS ARE NOT LUBRICATED

REPLACEMENT PARTS MUST BE LUBRICATED AT TIME OF ASSEMBLY. USE AMOUNT LISTED ABOVE PER LOCATION THEN FOLLOW LUBE RECOMMENDATIONS OUTLINED ABOVE FOR LUBING INTERVALS.

Important—Read This First

The registration card is to be filled in completely and promptly returned to factory. It provides a ready reference to help you in securing parts and in answering questions that you may have at a later date.

This card does not put you on a mailing list. Nor is the information on the card made available to anyone else.

We urge the return of this card so that you will receive maximum service benefits.

Where a separate instruction manual has been received by the customer, a parts manual was sent with this machine. If you have not received the parts manual, ask your dealer.
