

ENGINEERING BULLETIN

November 2, 2012

**THE VOLTAGE REQUIREMENT TO OPERATE
THE BALZER GRAIN CART IS 12 VDC**

**THE ACTUAL MINIMUM VOLTAGE AT THE
COIL OF THE BALZER'S VALVE SHOULD BE
AT LEAST 10.5 VDC**

**When connecting to you tractor check to
assure it is at LEAST 10.5 VDC**

**The grain cart controls system will function
well only if sufficient VDC is provided.**

**Damage will result in operating
at lower level**
