### **HYDRAULIC CONNECTIONS FROM THE TRACTOR TO THE CART.**

IT HAS BECOME EVIDENT THAT SOME OF THE LOW PRESSURE CONNECTIONS TO SOME TRACTORS DO NOT HAVE SUFFICIENT CAPACITY TO RETURN ALL THE OIL USED BACK TO ITS SOURCE

ATTACH THE RETURN LINE FROM THE CART TO THE TRACTOR CONNECTION THAT IS USED FOR ORBIT MOTORS. THIS IS THE BEST PLACE TO DUMP ALL THE OIL FROM THE CART OIL SYSTEM.

THE UPPER LINE CONNECTS TO ONE OF THE TRACTOR VALVE BANK SECTION (OIL TO THE CART)

THE LOWER LINE RETURNS THE OIL TO THE TRACTOR LOCATION USED ALSO FOR ORBIT MOTORS
